

Process Mining: Data Science in Action

# Process Mining: Data Science in Action

✓ Verified Book of Process Mining: Data Science in Action

## Summary:

Process Mining: Data Science in Action pdf download free is brought to you by vrinfodesign that special to you no cost. Process Mining: Data Science in Action textbook download pdf made by Wil van der Aalst at April 26th 2016 has been changed to PDF file that you can read on your laptop. For the information, vrinfodesign do not host Process Mining: Data Science in Action download free pdf on our website, all of book files on this site are collected via the syber media. We do not have responsibility with missing file of this book.

This is the second edition of Wil van der Aalst s seminal book on process mining, which now discusses the field also in the broader context of data science and big data approaches. It includes several additions and updates, e.g. on inductive mining techniques, the notion of alignments, a considerably expanded section on software tools and a completely new chapter of process mining in the large. It is self-contained, while at the same time covering the entire process-mining spectrum from process discovery to predictive analytics.

After a general introduction to data science and process mining in Part I, Part II provides the basics of business process modeling and data mining necessary to understand the remainder of the book. Next, Part III focuses on process discovery as the most important process mining task, while Part IV moves beyond discovering the control flow of processes, highlighting conformance checking, and organizational and time perspectives. Part V offers a guide to successfully applying process mining in practice, including an introduction to the widely used open-source tool ProM and several commercial products. Lastly, Part VI takes a step back, reflecting on the material presented and the key open challenges.

Overall, this book provides a comprehensive overview of the state of the art in process mining. It is intended for business process analysts, business consultants, process managers, graduate students, and BPM researchers.
